

# Sanitary Ware - Product Code: Stainless Steel Door Barriers KDB168

## Product Specification:

- Grade 304 stainless steel
- Satin finish 320 grit polished
- Easy Installation
- 3mm thick stainless steel
- Easy to Install
- Countersunk Fixings
- No dirt traps

## Product Dimensions:

Reference	Height	Width
KDB168	2500mm	2000mm

## Options:

---

Stainless Steel Grade	Finish	Thickness	Length
304	Satin Finish 320 Grit Polished	2mm	1200mm
316	Electropolished	3mm	1500mm
	Bead Blasted		1800mm
	Bead Blasted & Electropolished		
	320 grit polished & Electropolished		
	Powder Coated		

## Overview:

---

Designed for areas where heavy duty loading traffic is prevalent. The door barriers are designed to withstand impact and to protect fragile doors, cladding and door surrounds. The barriers also provide protection for doorways from trolleys, mobile bin units and pallet trucks.

## Maintenance:

---

### Stainless Steel:

Clean the stainless steel components using warm water with a mild detergent with a non abrasive cloth or sponge. Heavier stains may require the use of a nylon scouring pad or a stainless steel cleaner. To remove paint or graffiti (or light concrete splashes) use a cloth and alkaline or solvent paint strippers according to type of paint.

For Satin Finish Stainless try to follow the direction of the grain when cleaning vigorously or polishing. For Bead Blasted Finish use a circular motion.

Rust spots or 'tea stains' can occur on the surface of the material, these are normally caused by contamination from ordinary mild steel, particularly in areas where construction work has been undertaken.

Where contamination of the stainless has occurred from ordinary mild steel coming into contact with the stainless, use Rust Remover 410. In cases where the surface is severely stained as a result of severe environmental conditions or scratched due to misuse, it may still be possible to restore the original finish using chemicals such as Oxalic Acid solution. There are many stainless steel polishes available to enhance the surface finish. We recommend [Mister Stainless Ltd.](#) as a provider for stainless steel cleaning products
